

# CUTTING MADE EASY

If you've already tried out Sizzix® dies, you'll know how quick and easy it is to accurately cut out a range of shapes time after time. Time saved cutting out your shapes with a Sizzix® machine means you can spend more time on the fun part, creating your masterpiece! Traditionally rotary cutters and a ruler are used to cut out pieces. With our die-cutting systems, that time consuming and laborious job is much easier.

## CHECK OUT JUST SOME OF THE BENEFITS BELOW...

Rotary cutting is not always accurate as the ruler can slip and templates for curved shapes can move. With our shape cutting dies, you get an accurate, consistent cut every time.

The sharp blade on rotary cutters can be dangerous. The blades in our dies are concealed in a layer of thick foam meaning they are perfectly safe.

Although rotary cutters themselves are portable, the cutting mats can be awkward to carry around with you.

Die-cutting your shapes on the Big Shot™, Big Shot™ Express or Big Shot™ Plus machine is much quicker than doing so by hand, plus depending on the fabric you can cut up to 8 layers at a time!

All our patchwork dies have a built in ¼" (6mm) seam allowance.

You can easily create blocks with our selection of geometric dies.
