

657116 Sizzix® Bigz™ Die - Flower, 3-D Wrapped by Eileen Hull

1. Die-cut multiple large and small petals and a Flower base from material of choice.

2. Wrap or cover the top 1 1/2" of a dowel or skewer with adhesive.

3. Place a strip of adhesive on one of the edges of each petal part.

4. Wrap a small petal tightly around the skewer or dowel. Start with the non-adhesive edge and finish by adhering it to itself. Repeat this process, going from the small to the large petals.

5. Once the Flower is the desired size, finish it off with the Flower base piece to hold everything in place.
