

657152 Sizzix® Bigz™ Pro Die – Flower, 3-D

657153 Sizzix® Bigz™ Pro Die – Flowers, 3-D #2

1. Die-cut Flower from chosen material.

2. Coil Flower around a small cylinder, starting from the outside and working your way toward the center. In this example, the mid-sized Flower is wrapped around a pencil.

3. Holding the base in one hand, arrange the Flower by uncoiling the petals on top of the center base.

4. Apply a generous amount of adhesive to the base of the Flower. The number of petals included in the base will depend on the tightness of the coil.

5. Press the petals into the base until adhesive has set.
